PROJECT LEADER PROGRAM

Course Outline

In today's ever-evolving business landscape, leadership is a dynamic and demanding role. Whether you are an emerging leader looking to hone your skills or a seasoned professional seeking to stay ahead of the curve, the Learning and Development Leaders Course offers a wealth of benefits that make it a must for leaders at all levels.

Skill Enhancement: From project management to team effectiveness and continuous improvement, you'll gain the competencies necessary to excel in your role.

Improved Project Management: Effective project management is essential for leaders. By mastering project scope, time management, and information communication, you'll be better equipped to lead successful projects that align with your organisations objectives.

Enhanced Communication: Strong communication is at the heart of effective leadership. By equipping you with the tools to communicate clearly with stakeholders, resolve conflicts, and keep your team on the same page, will ultimately leading to better outcomes.

Time Management Mastery: Time is a finite resource, and leaders must make the most of it. Learning how to manage project timelines and resources effectively will enable you to meet deadlines and optimise productivity, ensuring your projects stay on track.

High-Performing Teams: Leaders are only as strong as their teams. By acquiring the skills to manage team effectiveness, you can create a collaborative and productive team culture, motivating team members to excel and work cohesively.

Continuous Improvement: Staying competitive in today's business world requires a commitment to continuous improvement. This course teaches you how to identify opportunities for process enhancement, implement improvement initiatives, and foster a culture of innovation and excellence within your organisation.

Career Advancement: Leadership roles often come with increased responsibilities and expectations. Completing this course not only equips you with the skills needed to succeed but also makes you a more attractive candidate for leadership positions and career advancement opportunities.

Personal Growth: Leadership is not just about managing others; it's also about personal growth and development. This course offers a chance to invest in yourself, build your confidence, and become a more effective and impactful leader.

Target Audience

In the dynamic world of Learning and Development, you're constantly immersed in a whirlwind of projects. These ventures span a wide spectrum, from crafting and revamping learning programs to collaborating with your IT team for the seamless integration of cutting-edge tools like virtual learning platforms and Learning Management Systems (LMS).

You might even find yourself leading an expansive organisation learning endeavours, such as leadership development programs. As the landscape of learning and development evolves to meet the ever-changing needs of learners, a structured project management approach is your key to navigating projects of increasing complexity and achieving greater impact.

No matter the project type, every learning initiative calls for a skilled project manager adept at shaping timelines, managing budgets, setting priorities, mitigating risks, and soliciting valuable input from stakeholders.

Our nationally accredited program offers a unique advantage by introducing you to essential project management skills and demonstrating their practical application within the Learning and Development space through real-world examples and hands-on activities. This program empowers you to efficiently oversee learning projects using systematic, repeatable, and adaptable processes tailored to our field.

Whether you're an integral part of an in-house learning and development team or a thriving independent consultant, mastering the art of project management transforms you into an invaluable asset for the teams you support.

Consider these real-world scenarios where project management skills become indispensable in the Learning and Development arena:

- Developing and delivering cutting-edge training programs
- Seamlessly integrating new, transformative learning technologies
- Streamlining the onboarding process for new hires
- Delivering exceptional performance management and coaching experiences
- Conducting comprehensive training needs assessments
- Assessing and fine-tuning existing training programs
- Skilfully managing budgets and resources for dynamic learning and development initiatives

At the successful completion of the program you will receive a Statement of Attainment for the following units of competency which can be used towards obtaining BSB50820 Diploma of Project Management.

- BSBPMG511 Manage Project Scope
- BSBPMG535 Manage project information and communication
- BSBPMG531 Manage project time
- BSBTWK502 Manage team effectiveness
- BSBSTR502 Facilitate continuous improvement

Delivery Methods

Blended Learning

Blended learning seamlessly combines the best of both worlds: traditional in-person instruction and the flexibility of online learning.

Our program leverages this approach to deliver a comprehensive learning experience that fits your busy schedule while ensuring hands-on, practical learning.

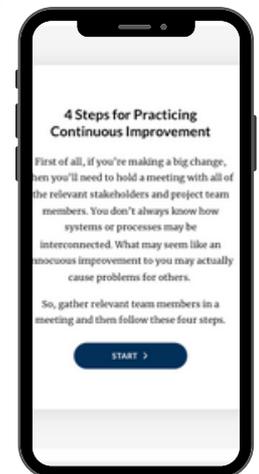

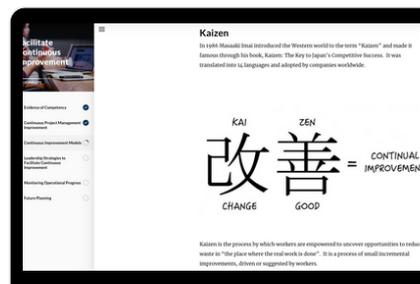

Interactive Workshop: Engage in an immersive, face-to-face workshop led by industry experts. Here, you'll dive deep into project management principles and explore their specific application within the Learning and Development field. These workshops provide a supportive environment for real-time interaction, networking, and skill-building.

Online Modules: Access our online modules from anywhere at your convenience. These modules are designed to reinforce workshop content and provide you with in-depth resources, case studies, and self-assessment tools. Dive into the material at your own pace and revisit key concepts whenever you need them.

Practical Assignments: Apply your knowledge to real-world scenarios through practical assignments. These hands-on projects bridge theory and practice, allowing you to hone your project management skills in a safe and supportive environment. Alternatively use a project you are currently engaged on in the workplace.

Expert Guidance: Benefit from the mentorship of professionals who have successfully navigated the Learning and Development landscape. Our experts provide personalised guidance, answer your questions, and offer insights based on their extensive experience.

Peer Learning: Connect with a diverse group of fellow learners from various backgrounds and industries. Share experiences, collaborate on projects, and gain fresh perspectives through peer discussions, group activities, and networking opportunities.

Units of Competency

The development of these competency units involved collaboration with industry experts and our trainers who use real-life case studies and examples to provide practical and relevant knowledge applicable to your job.
